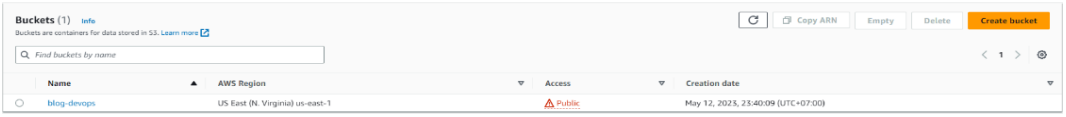
UDACITY

Deploy Static Website on AWS

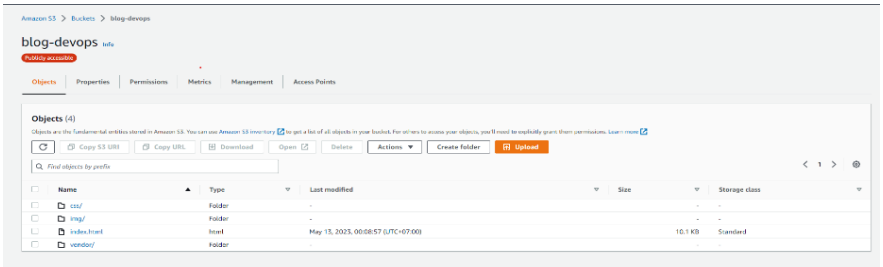
REVIEW
CODE REVIEW
HISTORY

Meets Specifications
Great Work!

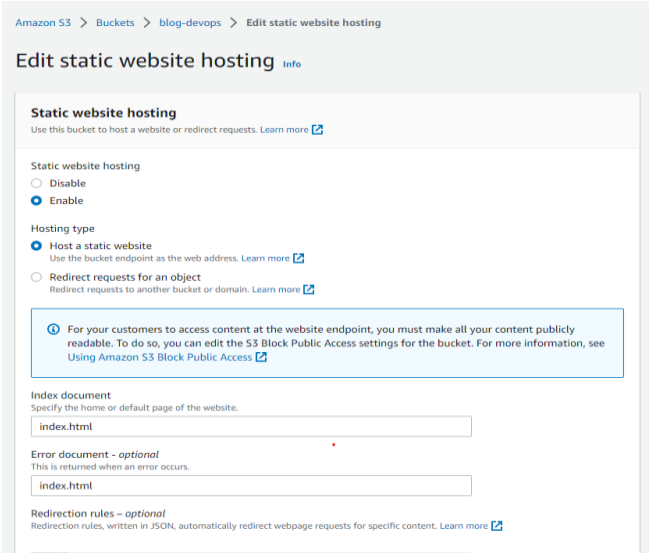
Website Files
The S3 bucket is visible in the AWS Management console.



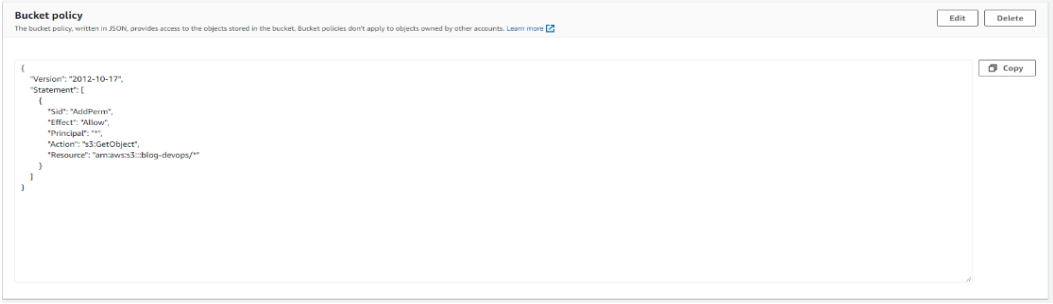
The student has submitted a screenshot showing all the website files uploaded to the newly created S3 bucket.



The S3 bucket is configured to support static website hosting.



The bucket should allow public access. The S3 bucket has an IAM bucket policy that makes the bucket contents publicly accessible.



Website Distribution

CloudFront has been configured to retrieve and distribute website files.
